Professional Summary

Results-driven ELV Senior Technician with 14+ years of hands-on experience in Qatar and the Philippines, actively seeking to transition into an ELV Supervisor or ELV Site Engineer role. Proven expertise in leading technical teams, managing large-scale security installations (CCTV, ACS, Barriers), and coordinating with project stakeholders. Certified in Cisco Networking and Google IT Support, with a strong track record of delivering critical projects like Qatar Energy LNG and Qatar Foundation.

Technical Skills

Security Systems

- **CCTV** (Hikvision, Dahua, Pelco)
- **Access Control** (Lenel OnGuard)
- **Barrier Systems** (Came, Centurion)
- **Intercom/Speedgate** (Zenitel, Gunnebo)

Networking

- **Cisco Switch Configuration**
- **VLAN/Routing**
- **TCP/IP Troubleshooting**
- **Wireless Access Point**

IT Support

- **Windows OS/Server**
- **PC Assembly**
- **Hardware/Software Config**
- **Technical Documentation**

Work Experience

ELV Senior Technician

Capital Security Systems | Doha, Qatar | Feb 2018 – Present

- Supervised and executed the end-to-end installation, testing, and commissioning of large-scale ELV systems across major national infrastructure projects.
- Led and managed a team of junior technicians, delegating daily site tasks, monitoring project progress, and ensuring compliance with safety and quality standards.
- Coordinated directly with Project Managers, Main Contractors, and client to align ELV technical requirements and resolve site bottlenecks.
- Managed the configuration and deployment of Cisco switches (VLAN/Routing), computer hardware, software, and application support networks.
- Diagnosed and rectified complex system faults in a timely manner to maintain optimal security system operations.
- **Technology:** **CCTV** (Pelco, IndigoVision, Hikvision, Dahua, TruVision, Samsung), **Barrier** (Came, Centurion, BFT), **Access Control** (Lenel OnGuard).

Technical Field Engineer

Circuit Solutions Inc. | Pasig City, Philippines | May 2011 – Feb 2018

- Studies features and functionalities of products
- Provides technical support to sales during presentation.
- When assigned, conducting regular maintenance provides necessary recommendations to ensure the company system functions properly and optimally.
- Site survey, Installation, Testing and Commissioning.

- Provides design/layout for projects such as CCTV system, traffic lights, EAS, etc.
 - Technology: **HyperVision** and **Hikvision** for CCTV, **GeoVision** for ACS.
-

Certifications

- Google IT Support Professional Certificate (Google, 2024)
 - Networking Basics (Cisco Academy, 2025)
 - IT Security: Defense Against Digital Dark Arts (Google, 2024)
 - Computer Hardware Basics (Cisco Academy, 2023)
 - Operating Systems Basics (Cisco Academy, 2023)
 - Operating Systems and You Becoming a Power User (Cisco Academy, 2024)
 - The Bits and Bytes of Computer Networking (Cisco Academy, 2024)
 - System Administration and IT Infrastructure Services (Cisco Academy, 2024)
 - Technical Support Fundamental (Cisco Academy, 2024)
 - Introduction to Cybersecurity (Cisco Academy, 2025)
 - Networking Basics (Cisco Academy, 2025)
 - Networking Devices and Basic Config Update (Cisco Academy, 2025)
 - Panduit Structured Cabling (Subic, 2015)
-

Education

Associate Degree in Electronic Technology
Skill Power Institute, Antipolo City | *2011*

Projects

Qatar Energy LNG: (2023 – Present)

- Led the end-to-end installation, configuration, and commissioning of integrated ELV systems (CCTV & ACS) to fulfill stringent oil and gas security protocols.
- Conducted comprehensive site survey, reviewed engineering drawing, and planned device placement to achieve maximum system coverage and network efficiency.
- Coordinated with IT departments and external sub-contractors to execute seamless system integration into the live plant infrastructure.

Qatar Foundation: (2022 – 2025)

- Managed and oversaw the routine preventive and corrective maintenance schedules for integrated CCTV, Barrier, and Access Control systems across multiple facilities.
- Supervised the rapid diagnosis and rectification of system error, drastically reducing equipment downtime and delivering accurate technical incident logs to management.

Qatar National Convention Center – FIFA World Cup 2022 Media Center. (June 2022 – Feb 2023)

- Headed the 24/7 site technical support and emergency incident response team, securing 100% operational uptime for ELV security infrastructure during a major global event.
- Performed system testing, troubleshooting, and network continuity checks to verify full functionality and seamless communication with monitoring systems.
- Executed critical network continuity and system functionality checks under high-pressure environments to comply with strict international security standards.

Qatar Airways: (2018 – Present)

- Directed monthly preventive maintenance and structured system testing for multi-site Access Control, Speed gates, and IP CCTV systems.
- Supervised the installation, expansion, and programming (PTZ cameras, magnetic locks, sensor) for multi-door security zones.

Old Doha Airport: (2018 – Present)

- Responsible for routine preventive and corrective maintenance of the site's integrated CCTV and Access Control systems.
- Installed and programmed IP cameras, PTZ units, credential readers, magnetic locks, and sensors for multi-door access control systems.
- Performed system testing, troubleshooting, and network continuity checks to verify full functionality and seamless communication with monitoring systems.
- Monitored and maintained that all systems are functioning properly.

Qatar Olympic Committee: (2018 – Present)

- Conducted monthly checks and maintenance on CCTV, Barrier and Access control System.
- Installed and programmed IP cameras, PTZ units, credential readers, magnetic locks, and sensors for multi-door access control systems.
- Performed system testing, troubleshooting, and network continuity checks to verify full functionality and seamless communication with monitoring systems.

Woqod: (2018 – Present)

- Conducted monthly checks and maintenance on Access control System in Woqod tower and all Woqod Petrol Station.
- Performed system testing, troubleshooting, and network continuity checks to verify full functionality and seamless communication with monitoring systems.
